

Joshua Martinez

Senior Full Stack Software Engineer

✉ joshuacm635@gmail.com

EDUCATION

Bachelor of Science
Computer Science
Florida State University
📅 Graduated: August 2014

SKILLS

- Programming Languages: JavaScript, TypeScript, Python, Ruby, Java, C++, SQL, Go, Ruby
- Frontend: React.js, Node.js, Express, Angular, Vue.js, HTML5, CSS3, SASS, Webpack
- Backend: Node.js, Django, Flask, Express, Ruby on Rails, ASP.NET,
- Google Cloud, Docker, Kubernetes, Terraform, Jenkins, CI/CD
- Databases: MongoDB, MySQL, PostgreSQL, Redis
- Version Control: Git, GitHub,
- Bitbucket, GitLab
- Testing: Jest, Mocha, Cypress, Selenium, TestNG
- Project Management: Jira, Trello,
- Agile, Scrum, Kanban
- Tools: Docker, Kubernetes, Jira, Confluence, Jenkins, AWS, Google Cloud, Azure
- Other Skills: RESTful APIs, Microservices, GraphQL, SQL, NoSQL, Cloud Integration, Continuous Integration & Deployment, Agile Methodologies, UX/UI Design, Frontend & Backend Integration, Mobile App Deployment

CAREER OBJECTIVE

A results-driven Senior Full Stack Software Developer with 10 years of experience, specializing in building scalable web and mobile applications using modern frameworks and cloud technologies. Proficient in Node.js, React.js, and Python, with extensive experience in designing and implementing RESTful APIs, microservices, and cloud-based solutions. Skilled at leading development teams, optimizing system performance, and delivering high-quality software solutions in remote and hybrid environments. Expertise in cloud platforms like AWS, Azure, and Google Cloud, and experienced in leading teams to achieve significant performance improvements. Committed to continuous learning and adapting to evolving technologies, with a focus on improving user experiences and increasing application performance.

WORK EXPERIENCE

Senior Full Stack Developer

Inoxoft

📅 July 2023 - current 📍 Remote

- **Migrated** 15 legacy systems to scalable microservices using Node.js and Python, improving scalability by 30% and reducing downtime by 20%.
- **Designed and developed** 10+ web and mobile apps with React.js frontends and cloud-based backends, enhancing user engagement by 30% and responsiveness for over 10,000 users.
- **Achieved** a 40% reduction in deployment times and a 25% decrease in errors by optimizing cloud infrastructure with Terraform on AWS, Azure, and Google Cloud.
- **Led and mentored** a team of 8 developers, improving project delivery speed by 20%, code quality by 30%, and reducing bug reports by 15% in six months.
- **Implemented** robust testing frameworks (Jest, Mocha, Cypress, Selenium) within CI/CD pipelines, decreasing production bugs by 30%.
- **Increased cross-browser compatibility**, reducing user-reported issues by 25% and regression issues by 20%, leading to a 15% improvement in user satisfaction.

Senior Software Engineer

Access Global Group

📅 September 2021 - May 2023 📍 Remote

- **Architected** cloud-based SaaS products, increasing customer engagement by 40%.
- **Engineered** backend services in Node.js and Python, enhancing performance by 30% and supporting scalability for 10,000 concurrent users.
- **Led** cloud migration projects to AWS, reducing operational costs by 15%.
- **Coached** five junior developers, boosting team productivity by 30% and elevating code quality standards by 25%.
- **Developed** high-performance backend services using Node.js and Python, achieving a 25% reduction in response time during peak traffic.
- **Implemented** React Native enhancements, increasing mobile user engagement by 35% and achieving a significant rise in app store ratings.

- Soft Skills: Communication, Problem-Solving, Time Management, Adaptability, Teamwork, Emotional Intelligence, Leadership, Curiosity, Continuous Learning

Full Stack Web Developer

Shopify

📅 July 2019 - August 2021

📍 Hybrid

- **Developed** web apps with React.js and Node.js for 10 enterprise clients, boosting user engagement by 25%.
- **Created** high-performance backend services with Python, enhancing database processing speed by 40% and achieving a 25% reduction in API response times.
- **Established** CI/CD pipelines that enhanced deployment efficiency by 30%, facilitating rapid software updates across three key product lines.
- **Redesigned** UI components with Tailwind CSS and SCSS, achieving 100% compliance with brand standards and user accessibility guidelines.
- **Created** unit and UI tests (Jest, Mocha, Cypress, Selenium), improving test success rates by 95% and reducing manual testing by 35%.

Front End Developer

Produce Magic Software

📅 February 2015 - Mar 2019

📍 Onsite

- **Designed and implemented** web applications with React.js, Angular.js, and Tailwind CSS, driving a 25% improvement in user engagement metrics.
- **Implemented** code-splitting and lazy loading techniques, decreasing asset load times by 20%.
- **Collaborated** with senior developers and designers to create pixel-perfect UI components, ensuring high-quality implementation of design specifications and boosting customer satisfaction by 25%.
- **Collaborated** with product managers and backend developers, delivering key features on schedule and enhancing project delivery timelines by 10%.
- **Participated** in usability testing and collaborated with QA teams to identify and address front-end bugs, contributing to a 15% reduction in post-release defects.
- **Adhered** to accessibility standards (WCAG), implementing features to ensure inclusivity for all users and improving compliance rates by 25%.
